AMI AutoAGENT ERP EDI and Barcode Solutions

AMI AutoAGENT EDI Processor for Microsoft Dynamics™ GP

AMI's **AutoAGENT EDI Processor for Microsoft Dynamics GP** provides a seamless pathway for passing EDI orders to the Microsoft Dynamics GP Sales Order Processing module. The AMI AutoAGENT EDI Processor's unique ability to streamline the EDI workflow means orders are processed more efficiently and accurately than alternative methods.

Customer EDI orders received through the **AutoAGENT EDI Processor** are translated and integrated into Dynamics GP Sales Order Processing. These orders can then be processed and transferred to invoices within the GP Sales Order Processing module. Once orders are fulfilled and shipped, Dynamics GP can transfer the invoice data to the AutoAGENT EDI Processor for ASN (856) generation and transmission to customers.

- Receive inbound EDI 830 or 850 orders from trading partners and push data into GP Sales Order Processing transaction entry.
- Generate and print trading partner - UCC-128 barcode container labels.
- Create trading partner specific outbound 856 (ASN's) from completed sales invoices.

AMI and Microsoft Dynamics solutions seamlessly connect business systems throughout all departments with the personal productivity tools your people already know. This helps your finance people keep the money flowing through the system smoothly. It allows your operations people to work collaboratively and efficiently with one another and your supply chain partners. It also gives your sales and marketing team access to the information it needs to make each customer a repeat customer.

Bottom line—with AMI and Microsoft Dynamics solutions, your people are provided with the technology tools that they are comfortable with so they can work to their full potential.
