

AMI AutoAGENT *enhance the way you work...*

(FEATURES OVERVIEW)

Ship Components and Receive Back Sub-Assemblies

Vendor Routing with Automatic Component Back-flushing

Rank Outside Processors on Price / Quality / Delivery

Automatic Daily Pick List By Vendor

Simplify Cycle Counting of Outside Process Inventory

Runs on Microsoft Dynamics™ GP

Microsoft
GOLD CERTIFIED
Partner

Microsoft Business Solutions

Outside Processor

AUTOMATE OUTSIDE PROCESSING ACTIVITIES. The AMI AutoAGENT Outside Processor automatically schedules outbound shipments and tracks inventory by vendor location to give you total visibility of all your outside processes.

SAVE TIME AND EFFORT with easy to use Outside Process tracking tools.

Vendor Routing allows you to send individual components and receive completed assemblies with automatic back-flushing.

Line	Component Item Number	Del	Component Routing Name	Comp/Qty	Item Weight
1	0397821	X	STANDARD	1.00	0.00
2	0370822	X	STANDARD	10.00	0.00
0		X			

Know the status of outside process operations with easy to use AutoAGENT tools.

Line	Item Number	Routing	Serial/Lot	Quantity
2	0370820	STANDARD	L0T1	2.865.00000
3	0370820	STANDARD	L0T123456	856.00000
4	0370820	STANDARD		2.284.00000

Item Number	Routing	On-Time	Quality	Price	Total	PV	Quote Price	Last Ship Date
0370810	STANDARD	4	2	5	11	Y	2.00000	6/16/2006
0370822	STANDARD	2	2	3	7	Y	0.34000	7/5/2006
0370820	STANDARD	4	4	3	11	N	0.00000	10/4/2006
0397820	STANDARD	0	0	0	0	Y	0.02500	10/2/2006

Ranking your Outside Process vendors ensures that the best vendor is used to provide the highest quality, delivery and price.

CUT COSTS and IMPROVE OPERATIONS by having visibility of outside processing activity for more efficient and cost effective control of your manufacturing processes.

CUT COSTS AND IMPROVE OPERATIONS

Microsoft Business Solutions

AMI AutoAGENT ERP enhances the flow of information throughout your company. As a result, the accuracy and the speed of your production is increased allowing you to do more with less. This translates into more profitable operations without sacrificing quality, delivery, or price. Here are just some of the benefits you will experience after implementing AMI AutoAGENT ERP:

- Enhance your environment** The AMI AutoAGENT ERP business solution is built on Microsoft .NET technology and is seamlessly integrated with Microsoft Dynamics GP. These solutions work like and with familiar Microsoft software, which means less of a learning curve for your people, so they can get up and running quickly and focus on what's most important for your business.
- Less data entry and errors** With AMI AutoAGENT ERP, all of your company's information is organized into one seamlessly integrated system. There is no need for re-keying of information by different departments and there is less need for manual paperwork. This greatly reduces the potential for errors.
- Cut operations Costs** Key Performance Indicators allow decision makers insight into what is going right or wrong within their demand production environment. AMI AutoAGENT ERP provides historical and real-time visibility into these indicators. Problems can be identified and adjustments can be made sooner rather than later, with confidence.
- Increase throughput** AMI AutoAGENT ERP monitors resource availability. As demand is generated, resources are automatically allocated. Production is given visibility to potential bottlenecks allowing for appropriate adjustments to scheduling. This creates greater efficiency while reducing downtime and overtime.
- Value delivered** When a business management solution works the way your current technology works, it fits easily and seamlessly into your existing systems and helps you maximize your technology investment. Software that's roles-based and targeted around the specific jobs people do can provide tremendous value and insight because it:
- Is familiar, helping reduce the time required to learn how to use it, and freeing up time to focus on what matters most.
 - Fits with your systems, helping to maximize your investment in Microsoft technology.
 - Fuels your business productivity, automating your business-critical operations and adapting to fit into your type of business, helping to ensure the most relevant insight.
 - Helps enable confident decision making, providing you with more complete insight across your organization.

Shorten Transaction Cycles
Reduce Inventory Costs
Eliminate Missed Ship Dates

Decrease Production Costs
Ensure AIAG Standards
Stamp Out Production Errors

Ship the Right Product
Improve Resource Allocation
Enhance Communication
