Keystroke Error

Runs on Microsoft Dynamics™ GP

## Shipping Manager

**DELIVER THE RIGHT PRODUCT ON TIME.** The AMI AutoAGENT Shipping Manager provides manufacturers with complete control over their crucial shipping and staging requirements. Access to all details of shipments are monitored and maintained for review, for edit, and for required document creation.

**SAVE TIME AND EFFORT** by providing a single point of control for all your shipments.

All scheduled shipments are automatically displayed in Carrier/Window order and gives you a status of the shipment...

Control Group	Date	Plant	Carrier	Time	Status	Ship Method
1	2/11/2005	NORFOLK		03:05	Printed_S	
1	3/20/2005	NORFOLK	carrier	03:05	Printed_S	
1	12/12/2005	ROMULUS		03:24	Staged	

The Dock Monitor gives you a real-time view of all the shipments that have been picked, packaged and ready to ship out the door to your customers...

Select	Date	Plant	Carrier	Time	Status
<input type="checkbox"/>	2/11/2005	NORFOLK		03:05	Staged
<input type="checkbox"/>	3/20/2005	NORFOLK	carrier	03:05	Staged
<input checked="" type="checkbox"/>	12/12/2005	ROMULUS		03:24	Picked

Returnable container shipment and receiving is handled effortlessly with Shipping Manager.

Invoice Number	Container Number	Item Description	Shipped Qty	Ship Date	Received Qty
IVC205	0370810		68	1/8/2005	1
IVC24	0370822		70	1/20/2005	1
IVC250	2118	Returnable container	170	1/15/2005	1
IVC360	2118	Returnable container	920	2/14/2005	1

**CUT COSTS and IMPROVE OPERATIONS** by bringing automation to your shipping processes.

## CUT COSTS AND IMPROVE OPERATIONS

Microsoft Business Solutions

AMI AutoAGENT ERP enhances the flow of information throughout your company. As a result, the accuracy and the speed of your production is increased allowing you to do more with less. This translates into more profitable operations without sacrificing quality, delivery, or price. Here are just some of the benefits you will experience after implementing AMI AutoAGENT ERP:

- Enhance your environment** The AMI AutoAGENT ERP business solution is built on Microsoft .NET technology and is seamlessly integrated with Microsoft Dynamics GP. These solutions work like and with familiar Microsoft software, which means less of a learning curve for your people, so they can get up and running quickly and focus on what's most important for your business.
- Less data entry and errors** With AMI AutoAGENT ERP, all of your company's information is organized into one seamlessly integrated system. There is no need for re-keying of information by different departments and there is less need for manual paperwork. This greatly reduces the potential for errors.
- Cut operations Costs** Key Performance Indicators allow decision makers insight into what is going right or wrong within their demand production environment. AMI AutoAGENT ERP provides historical and real-time visibility into these indicators. Problems can be identified and adjustments can be made sooner rather than later, with confidence.
- Increase throughput** AMI AutoAGENT ERP monitors resource availability. As demand is generated, resources are automatically allocated. Production is given visibility to potential bottlenecks allowing for appropriate adjustments to scheduling. This creates greater efficiency while reducing downtime and overtime.
- Value delivered** When a business management solution works the way your current technology works, it fits easily and seamlessly into your existing systems and helps you maximize your technology investment. Software that's roles-based and targeted around the specific jobs people do can provide tremendous value and insight because it:
- Is familiar, helping reduce the time required to learn how to use it, and freeing up time to focus on what matters most.
  - Fits with your systems, helping to maximize your investment in Microsoft technology.
  - Fuels your business productivity, automating your business-critical operations and adapting to fit into your type of business, helping to ensure the most relevant insight.
  - Helps enable confident decision making, providing you with more complete insight across your organization.

**Shorten Transaction Cycles**  
**Reduce Inventory Costs**  
**Eliminate Missed Ship Dates**

**Decrease Production Costs**  
**Ensure AIAG Standards**  
**Stamp Out Production Errors**

**Ship the Right Product**  
**Improve Resource Allocation**  
**Enhance Communication**
