

# AMI AutoAGENT *enhance the way you work...*

(FEATURES OVERVIEW)

Automatically Generate Vendor Releases from MRP Demand

Multi-Sourcing of Demand

Simplify Maintenance of Vendor Releases

Electronically Send Vendor 830 Material Releases

Maintain Proposed and Active Releases

Define Release Intervals Daily / Weekly / Monthly

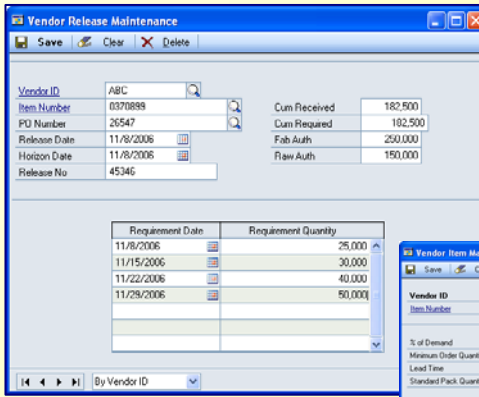

Runs on Microsoft Dynamics™ GP

## Vendor Releasing

**IMPROVE SUPPLY CHAIN DEMAND MANAGEMENT.** The AMI AutoAGENT Vendor Releasing module automatically consolidates raw material and purchased components requirements and generates 830 material releases to multi-source vendors.

**SAVE TIME AND EFFORT** with easy to use vendor releasing maintenance tools.

Easily make last minute changes to proposed releases.

Multi-source your vendor material requirements.

Send 830 Material Releases and easily view an XML 830 Report.

Req Date	Control No	Vendor ID	Req ID	Item	Quantity	Unit	Release Date	Release Type	Release Status	Release Date	Release Status	Release Date	Release Status
11/02/06	000000	ABC	000000	0370810	10000	EA	11/02/06	Proposed	000000170	Delivery Based	000000000	000000000	000000000

**CUT COSTS and IMPROVE OPERATIONS** by providing your vendors with accurate forecast demand leading to lower purchasing costs.

## CUT COSTS AND IMPROVE OPERATIONS

Microsoft Business Solutions

AMI AutoAGENT ERP enhances the flow of information throughout your company. As a result, the accuracy and the speed of your production is increased allowing you to do more with less. This translates into more profitable operations without sacrificing quality, delivery, or price. Here are just some of the benefits you will experience after implementing AMI AutoAGENT ERP:

- Enhance your environment** The AMI AutoAGENT ERP business solution is built on Microsoft .NET technology and is seamlessly integrated with Microsoft Dynamics GP. These solutions work like and with familiar Microsoft software, which means less of a learning curve for your people, so they can get up and running quickly and focus on what's most important for your business.
- Less data entry and errors** With AMI AutoAGENT ERP, all of your company's information is organized into one seamlessly integrated system. There is no need for re-keying of information by different departments and there is less need for manual paperwork. This greatly reduces the potential for errors.
- Cut operations Costs** Key Performance Indicators allow decision makers insight into what is going right or wrong within their demand production environment. AMI AutoAGENT ERP provides historical and real-time visibility into these indicators. Problems can be identified and adjustments can be made sooner rather than later, with confidence.
- Increase throughput** AMI AutoAGENT ERP monitors resource availability. As demand is generated, resources are automatically allocated. Production is given visibility to potential bottlenecks allowing for appropriate adjustments to scheduling. This creates greater efficiency while reducing downtime and overtime.
- Value delivered** When a business management solution works the way your current technology works, it fits easily and seamlessly into your existing systems and helps you maximize your technology investment. Software that's roles-based and targeted around the specific jobs people do can provide tremendous value and insight because it:
- Is familiar, helping reduce the time required to learn how to use it, and freeing up time to focus on what matters most.
  - Fits with your systems, helping to maximize your investment in Microsoft technology.
  - Fuels your business productivity, automating your business-critical operations and adapting to fit into your type of business, helping to ensure the most relevant insight.
  - Helps enable confident decision making, providing you with more complete insight across your organization.

**Shorten Transaction Cycles**  
**Reduce Inventory Costs**  
**Eliminate Missed Ship Dates**

**Decrease Production Costs**  
**Ensure AIAG Standards**  
**Stamp Out Production Errors**

**Ship the Right Product**  
**Improve Resource Allocation**  
**Enhance Communication**
